

Mikser MBN nudi visoke performanse i izvanrednu svestranost iskorištavanjem snage traktora. S čvrstom, ali aerodinamičnom strukturom, dizajniran je za homogenizaciju gnojnice u podzemnim spremnicima, čak i u teško dostupnima, gdje su prisutni čvrsti i vlaknasti materijali.

MBN mixer offers high performance and great versatility by exploiting tractor's power. Characterized by a solid but streamlined structure, it is designed for slurry homogenization in underground tanks, even accessible with difficulty, containing solid and fibrous matters.
